PROFESSIONAL SUMMARY

Data Analyst with 2 years of combined experience (MIS Assistant + Data Analyst Internship) in business intelligence, reporting, and data analytics. Skilled in Python, Microsoft Excel, Power BI, Microsoft Dynamics 365 CRM, Tableau, and SQL for building interactive dashboards, automating reports, and deriving actionable insights. Proven record of optimizing data processes, reducing reporting effort by 30%, and improving business decision-making through data-driven solutions.

EXPERIENCE

MIS Assistant (Data & BI Analytics) **April 2025 - Present**

Forsan Foods & Consumer Products

- Automated interactive dashboards using BI tools, reducing manual reporting time by 40%.
- Integrated multiple data sources (SQL Server, Oracle, Dynamics 365 Business Central, SharePoint) into unified BI models.
- Implemented row-level security (RLS) for 20+ users, ensuring secure role-based access.

Data Analyst Intern **June 2024 - March 2025**

Besant Technology, Chennai

- Designed KPI dashboards that improved visibility into sales and operational performance.
- Built data models using Power Query and optimized ETL pipelines, improving load times by 30%.
- Supported 24/7 BI operations, resolving ad-hoc requests and maintaining 99% SLA compliance.

PROJECTS

Fast Food & Business Central BI Dashboards

- Automated ETL pipelines with API integrations and scheduled refreshes in Power BI for onboarding, product tracking, and dine-in and takeaway performance.
- Built grocery and sales credit memo dashboards using Dynamics 365 data, delivering real-time insights on sales, VAT, cost, and quantity metrics.
- Developed advanced DAX measures, dynamic slicers, and RLS for 50+ users, reducing manual analysis effort by 35%.

Retail Sales Dashboard

- Developed a Power BI dashboard to track invoices, total sales, quantities, and unit prices.
- Created visuals by location, department, payment type, and monthly trends.
- Implemented dynamic date filters, automated refresh schedules, and DAX-based calculations.

Food Sales & Inventory Analysis (Python)

- Analysed food product sales, inventory, and wastage data from Dynamics 365 Business Central using Python (Pandas, NumPy) to identify slow-moving SKUs and demand patterns.
- Built automated data-cleaning and aggregation scripts to consolidate branch-wise sales and stock data, cutting manual processing time by 30%.
- Created visual reports with Matplotlib and Seaborn to track sales trends, cost variance, and inventory turnover, supporting procurement and pricing decisions.

TECHNICAL SKILLS

BI Tools: Power BI (Desktop, Pro, Service), Tableau

Languages & Databases: Python, SQL (MS SQL Server, Oracle), PostgreSQL

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Data Handling: Power Query, DAX, Advanced Excel

Cloud & Tools: Dynamics 365 Business Central, SharePoint, Git, Monday.com

EDUCATION

Bachelor of Engineering - Mechanical Engineering **2023**

Government College of Engineering, Srirangam — 70%
